## Projects

[All Projects](#)

### E-commerce

[Live Demo](#) | [Client](#) | [Server](#)

- Designed with a clean and intuitive layout, making it easy for customers to browse products and navigate through categories.
- Offers multiple secure payment options, including credit/debit cards and digital wallets, ensuring a safe shopping experience.
- Automatically updates product availability, providing customers with accurate stock information to enhance their shopping experience.
- Fully optimized for mobile devices, ensuring a seamless shopping experience across all screen sizes and enhancing accessibility for users on the go.

**Used Technology** :- Next.js 14 (with app routing), TypeScript, Tailwind CSS, Redux, Strapi, Stripe, Clerk, axios, lottie-react, sweetaleart2.

### YouTube video-player

[Live Demo](#) | [Client](#)

- Users can paste a YouTube playlist link, and the site fetches and displays all videos in the playlist using the YouTube API, making it easy to organize learning content.
- While watching a video, users can add notes with specific timestamps, allowing them to quickly revisit key moments or important points.
- Videos are embedded directly on the site, with controls for playback, so users can watch without leaving the platform, ensuring a seamless study experience.
- Each video in the playlist has a dedicated space for notes, helping users keep their observations and insights well-organized and easily accessible.
- Designed with a clean and intuitive layout, optimized for easy navigation, enhancing both the video-watching and note-taking experience.

**Used Technology** :- React, Javascript, Material UI, lottie-react, axios, easy-peasy, momentjs, prop-types, React-player, React-router-dom, React-toastify, shorted.
